

Recommended Percentages

Sheet 6

I have used a compilation of several sources and my own experience to derive the suggested percentage guidelines. However, these are only recommended percentages and will change dramatically if you have a very high or very low income. For instance, if you have a very low income, your necessities percentages will be high. If you have a high income your necessities will be a lower percentage of income and hopefully savings (not debt) will be higher than recommended.
